Here's a trim detail at soffit wall.. of course the finish would match exterior walk-in finish, and would need to know the distance between top of walk & soffit wall, then we'd add 6" to drop down past top & wall panel seam. Let me know of any questions..

So, are you saying a quarry tile base can be applied to the cove base trim?

I believe we're setting up a walk-in today.. whichever- yes, I can take some "actual" pics of the Cove Base Trim. I'll try to send those after lunch. If need, at the jobsite after the Quarry Tile has been applied, then fasten the Cove base to the

walk-in.. would even make a nicer trimmed out product I'd think.

Hi Monica
See the email from Cathy below . They are needing an actual photo of the cove base .

Rick,

We must have an actual photo of the finished base with walk-in cooler/freezer, so we can determine if we can install quarry tile base that we specify on the plans for the kitchen. We already knew and have what is attached. Surely they can provide us with a photo of the finished walk-in cooler/freezer. Please advise ASAP.

Thanks,

Cathy Wagner | Director of Architecture & Engineering

Hi Cathy
Here is the email that ICS sent to Nick on Monday . I have not heard anything back , if is all that is needed .

Thanks

Rick,

See below previous email from Nick. We haven't heard back from you on the cove base. This will affect both 2878 Tualatin and 2859 Portland, OR. We really need an answer on this ASAP. The

acrylume cove base that is detailed in the ICS structural design calculations should be shipped with the walk-in cooler freezer. Please advise.

Thanks,

Rick,
Can you please check with ICS on the cove base detail they call out on the last page of the structural drawings they sent to see if we can get a picture of the finished product. We are trying to find out what "Acrylume" is and if it's included in the WIC package. We also need to see what the finished product looks like so we can present it to PHI for approval since it looks like the standard tile cove base won't work. Thanks, and please give me a call if you have any questions.
